Report + Support

Report + Support is a centralised platform for students and staff to make an anonymous report and, where contact details are given, obtain support and guidance from a designated staff member.

Apart from being a reporting platform, the tool also contains information on various internal and external sources of support available for students and staff. It also provides information on what other support is available from local and national organisations. We know that people do not always feel comfortable making a report immediately after an incident. The support pages offer information and advice on what options are available to them, even if they then decide not to report.
