

MAPS, TOURS AND ROOM NUMBERS

# **Map and Room Information**

#### **Durham University Map**

This map gives you an overview of the Durham University estate. Please click this to access the map and building guide.

Helpful information once you find the Chemistry building:

**Reception** is on the First floor and is best reached by entering through the **red glass atrium** (you may hear it referred to as The Red Greenhouse!) Turn right and walk straight along the corridor, and it's **Room CG160** on the right. NB there is more than 1 entrance to the building and they are on different floors!

#### **Self-Guided Tours**

The University has a brand new app 'Durham University Tours' that is available to download in the <u>Apple App Store</u> and the <u>Google Play Store</u> This will enable you to take a range of self-guided tours around the city.

#### There are three tours that include:

- 'General Audio Tour' showing all of the main University and Department buildings
- 'Colleges Audio Tour' showing you the 17 Colleges
- 'Essential Practicalities Audio Tour' highlighting the essential practicalities you might need when living in Durham. This includes healthcare, food, travel and where to buy day-to-day essential items.

Tours have audio descriptions, images and videos as well as lots of information and statistics. The 'General Audio Tour' and 'College Audio Tour' also include walking route videos showing the way that you would walk between stops.

Additionally, within the app there is a list of 'Places to Eat and Drink' where the University has compiled 37 of their favourite cafés, restaurants and bars in one place. So if you're undertaking a self-guided tour in Durham, be sure to check this out.

Don't forget to complete the survey at the end of your tour or by clicking on the 'Audio Tours Survey' link in the menu items. The University is always working to make sure that what we offer is of the highest standard and love to hear your feedback!

You can also collect more information about Durham, the city and its surrounding area by visiting the official Durham Tourism website, This is Durham.

### Venues around the Campus

A handy key to help you find which building you need to attend. There is also a Chemistry Building Map which shows you all of the rooms in the department.

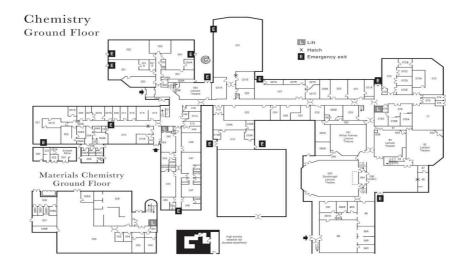

#### **Building Codes Key:**

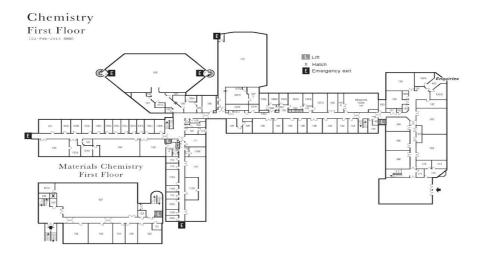

Rooms starting with:	are in building / Department
BL	Biosciences, Lower Mountjoy
